

Simple Maze Game

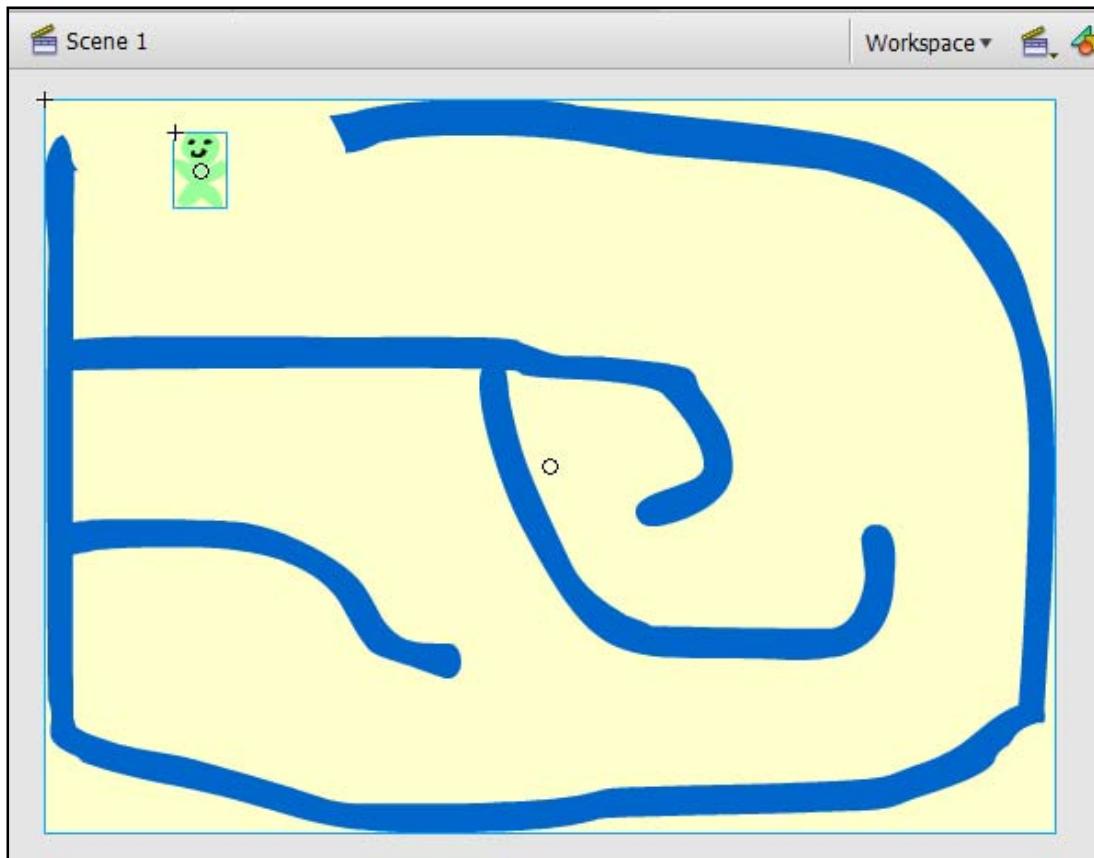

Step 1: insert a new movie clip, call it **dude** and draw a dude:

Step 2: Go back to Scene 1, and this time insert another new movie clip, call it **maze** and draw a maze:

Step 3: Drag both the **dude** and the **maze** movie clips onto the stage into *frame 1 layer 1*. Give the dude the instance name **dude** and the maze the instance name **maze**.

Step 4: Left-click on the dude movie clip (so it is selected) and hit F9. Add this code to the dude:

```
onClipEvent(enterFrame){  
    if(Key.isDown(Key.UP)){  
        this._y -= 3;  
    } else if(Key.isDown(Key.DOWN)){  
        this._y += 3;  
    } if(Key.isDown(Key.LEFT)){  
        this._x -= 3;  
    } else if(Key.isDown(Key.RIGHT)){  
        this._x += 3;  
  
    if(_root.maze.hitTest(_x+(_width/2),_y,true)){  
        this._x -= 3;  
    } if(_root.maze.hitTest(_x-(_width/2),_y,true)){  
        this._x += 3;  
    } if(_root.maze.hitTest(_x,_y+(_height/2),true)){  
        this._y -= 3;  
    } if(_root.maze.hitTest(_x,_y-(_height/2),true)){  
        this._y += 3;  
    } }
```

Step 5: Save and test. Adjust the dude's position slightly in the movie clip if it is slightly off centre.
